

Heatmap visualization of the Pearson correlation matrix for 20 variables, clustered by absolute correlation. The color scale ranges from -1.00 (dark blue) to 1.00 (dark red), with 0.00 being white. The variables are listed on both the x and y axes: DS, FM, MLTV, Nzeros, UC, Tendency, DP, LB, Mode, Mean, Median, Max, MSTV, Nmax, Width, Min, DL, Variance, AC, ASTV, and ALTV. The diagonal elements are all 1.00 (dark red). The matrix shows strong positive correlations (red/orange) between DS and FM, FM and MLTV, MLTV and Nzeros, Nzeros and UC, UC and Tendency, Tendency and DP, DP and LB, LB and Mode, Mode and Mean, Mean and Median, Median and Max, Max and MSTV, MSTV and Nmax, Nmax and Width, Width and Min, Min and DL, DL and Variance, Variance and AC, AC and ASTV, ASTV and ALTV. It also shows strong negative correlations (blue) between DS and MLTV, FM and UC, MLTV and UC, Nzeros and DP, UC and DP, Tendency and LB, DP and LB, LB and Mode, Mode and Mean, Mean and Median, Median and Max, Max and MSTV, MSTV and Nmax, Nmax and Width, Width and Min, Min and DL, DL and Variance, Variance and AC, AC and ASTV, ASTV and ALTV. The matrix is symmetric, with the lower triangle being a mirror image of the upper triangle.
